

PAPER CUTTING AND FOLDING

Reasoning and General Intelligence - Paper Cutting and Folding

In this section, a sheet of paper is folded in given manner and cuts are made on it. A cut may be of varying designs. We have to analyze how this sheet of paper will look when paper is unfolded.

Note that when a cut is made on folded paper, the designs of the cut will appear on each fold.

In each of following examples, figures A and B show a sequence of folding a square sheet. Figure C shows the manner in which folded paper has been cut. You have to select the appropriate figure from alternatives which would appear when sheet is opened.

EXAMPLE 1.

Sol. (a) Step-I When sheet C is unfolded once, it will appear as follows

Step II -

Clearly, the circle will appear in each of the triangular quarters of the paper.

EXAMPLE 2.

Sol. (b) Unfolded Step I

Step II

Since a quarter circle is made on folded paper. Therefore, when the paper is opened, a complete circle will appear on paper.

EXAMPLE 3.

Sol. (d) Here, a circular cut is made on the quarter circle. Hence, this sheet, when completely unfolded, will contain small circle on each quarter and will appear as option (d).

EXAMPLE 4.

Sol. (a) When sheet (c) is unfolded once, it will appear as shown below:

This sheet when completed unfolded will appear as option (a)

EXAMPLE 5.

Sol. (a) When sheet C is unfolded once, it will appear as shown below

This sheet, when completely unfolded will appear as option (a)

EXAMPLE 6.

Sol. (d) We untold the paper step by step as follows
Step I

Step II

Step III

So, option (d) is right one.

EXAMPLE 7.

Solution: (d) We unfold the paper step by step as follows.

Step I

Step II

What is Paper Folding and Paper Cutting?

Why do we need to know about Paper Folding and Paper Cutting?

Paper Folding and Cutting is a process in which a transparent sheet is folded and then a few cuts or folds are made.

In the problems dependent on Paper Folding and Cutting, a couple of figures are given describing the system in which a part is to be folded and then to be cut from a suitable section. The speckled line is the source line by which the paper is to be folded and the arrow shows the course of the overlap.

Therefore, the figures symbolize the flow during which the paper is to be folded. The patterns from the cut will appear on all of the folds formed on the paper.

In questions regarding paper folding and cutting it is often asked to find out both the folded and unfolded pattern of the sheet. let's see some examples. We even have some tricky questions below.

In the problems supporting Paper folding and cutting each of the resulting questions consists of a group of three figures X, Y, and Z showing a progression of folding of a piece of paper. Figure (Z) shows the line during which the folded paper has been cut.

These three figures are followed by four answer figures from which you've got to select a figure which might more approximately match the unfolded sort of figure (Z).

Example Problems on Paper Folding and Paper Cutting

Example 1: There is a set of three figures X, Y, and Z, showing a sequence of folding of a piece of paper. Figure (Z) shows the way the folded paper has been cut. Choose the figure that would most closely resemble the unfolded form of paper.

Answer:

(B)

Example 2: A transparent sheet of paper with markings is folded as shown in the question image. Which image would represent the sheet after the fold?

Answer:

(B)

Practice Problems on Paper Folding and Paper Cutting

Here are some questions for you to crack!!!

1. A square transparent sheet with a pattern is given. Select a figure from the options as to how the pattern would appear when the transparent sheet is folded along the dotted line.

2. There is a set of three figures X, Y, and Z, showing a sequence of folding of a piece of paper. Figure (Z) shows the way the folded paper has been cut. Choose the figure which would most closely resemble the unfolded form of paper.

3. Find out which option would appear when the transparent sheet is folded at the dotted line.

4. The given question consists of a set of four figures P, Q, R, and S showing a sequence of folding of a piece of paper. Fig (S) shows the way the folded paper has been cut. Select the figure from the options which would most closely resemble the unfolded form of Fig. (S).

Answers

1. (C) 2. (B) 3. (D) 4. (A)

Conclusion

Hope you enjoyed this reasoning activity. These activities like paper folding and paper cutting help children to understand the concepts and fill the gap in learning them.

Learning math with these activities will aid them to scale back the evasion created with the math Olympiad. Enjoy learning math!

Children learn fast, but it's always better to start slow and easy so that the basic concepts pertaining to paper folding are very clear to them. Some paper folding activities would include making easy shapes like a drinking cup, sailboat, pelican, or a ladybug.

Once your child masters this art, you can gradually move on to some more complex shapes and designs.
